

Full Stack Developer with 1 year of experience at Datapro Information Technology Pvt Ltd, skilled in the MERN stack (MongoDB, Express.js, React.js, Node.js). I specialize in building responsive UIs, scalable REST APIs, and integrating real-time features using Firebase. Proficient in React, Tailwind CSS, Bootstrap, and state management tools like Redux and Context API. Experienced with Agile workflows, Git, and performance optimization techniques like lazy loading and code splitting. Passionate about clean code, collaboration, and continuous learning.

TECHNICAL SKILLS

- Languages: JavaScript, Java
- Frontend: React.js, Next.js, Redux Toolkit, HTML, CSS, Tailwind CSS, Bootstrap, ShadCN/UI
- Backend: Node.js, Express.js, REST APIs, Firebase, Authentication (JWT, OAuth)
- Database: MongoDB, Mongoose, MySQL, SQL
- Tools: Git, GitHub, Postman, Netlify, Vercel

WORK EXPERIENCE

Full-Stack Developer | Datapro Information Technology Pvt Ltd

July 2024 – Aug 2025

- As a passionate MERN Stack Developer with 1 year of hands-on experience, I specialize in building scalable, responsive, and performance-optimized web applications using MongoDB, Express.js, React.js, and Node.js.
 - I have successfully delivered end-to-end full-stack projects by developing RESTful APIs, integrating real-time databases like Firebase, and crafting modern, reusable user interfaces with React.js, Tailwind CSS, and Bootstrap.
 - Proficient in state management using Redux and Context API, I seamlessly integrate third-party APIs, manage dynamic data flows, and ensure application security and stability using best practices like JWT-based authentication and role-based access control.
 - I follow clean code architecture, apply modular component design, and perform peer code reviews through GitHub/GitLab to maintain code quality.
 - I consistently optimize frontend and backend performance through lazy loading, code splitting, memoization, and caching strategies, achieving improved Lighthouse scores and reduced load times.
 - With experience in Agile/Scrum environments, I contribute actively to sprint planning, daily stand-ups, and retrospectives.
 - I'm adept with tools like Postman, VS Code, Git, Jira, and Figma, and capable of working collaboratively in cross-functional teams to meet business requirements and delivery timelines.
- TechStack: JavaScript, React.js,Node.jsMongodb, Firebase, HTML, CSS, Tailwind CSS,Framer Motion

EDUCATION AND CERTIFICATES

- Certificates :
- SQL : Basic, Intermediate , Advanced (HackerRank Certification)

Jan-2024
- REACT :Basic, Intermediate , Advanced (HackerRank Certification)

March-2025
- CSS : Basic, Intermediate , Advanced (HackerRank Certification)

Jun-2025
- Education: B.A(Echonomics)

2024

PROJECTS

- Note s Creatore

(Tech Stack: React.js,Node.js Tailwind CSS, JavaScript,Mongodb)

It is a platform where administratorscanmanage their Dairy/Notes.

The Personal Diary/Notes App is a full-stack web application that allows users to write, store, and manage personal notes securely. Implemented fully responsive design to ensure seamless user experience across all devices and screen sizes.

It pro vides a user-friendly and organized way to keep track of daily thoughts, ideas, or important reminders. Users can categorize notes, search for old notes, and secure their diary with authentication.
- Daily-Ecpense

(Tech Stack: React.js, Tailwind CSS,Famer motion, JavaScript)

Developed a responsive Daily Expense Tracker web app to manage and visualize expenses.

Implemented "Load More" pagination for efficient browsing of transaction history. Added auto-suggest search to quickly find specific expenses.

Enabled advanced filtering and sorting by date, category, and amount. Designed intuitive, mobile-friendly UI for smooth expense entry and tracking.

Utilized Redux Toolkit for scalable and optimized state management. Implemented fully responsive design to ensure seamless user experience across all devices and screen sizes.

Fully responsive design implemented to ensure a seamless and consistent user experience across all devices and screen sizes.
- Task Management

(Tech Stack: React.js, Redux Toolkit, CSS, Tailwind Css,JavaScript)

This platform serves as a powerful and intuitive task management system, where users and administrators can manage their daily tasks with ease.

Implemented fully responsive design to ensure seamless user experience acro all devices and screen sizes.

The Task Management App is a full-stack web application built to help users stay organized, focused, and productive.

It allows individuals to create, store, and manage their tasks or to-do items in a secure and user-friendly environment.

Fully responsive design implemented to ensure a seamless and consistent user experience across all devices and screen sizes.
